

Fabrice Allen Tchouani
Email: fabrice.allen@outlook.com | **GitHub:** <https://github.com/Faballen>

About:

Software Engineer with experience in **Backend Systems and Android development**. Cloud-integrated applications, **REST APIs**, and scalable mobile/web platforms. Skilled in **Java, Kotlin, Spring Boot, Node.js, TypeScript, GraphQL, SQL, Docker, AWS, Android jetpack compose**, with experience developing production applications, implementing testing strategies, and improving application architecture. Passionate about backend infrastructure, cloud technologies, distributed systems, and data-driven applications.

Programming Languages:

Backend & APIs: Spring Boot, Node.js, REST APIs, SQL, TypeScript, GraphQL

Cloud & DevOps: AWS SDK, Docker, GitHub Actions, CI/CD Concepts, Firebase

Testing: Jest, JUnit, Mockito, Debugging, Postman

Frontend: React, HTML5, CSS, Android with Jetpack Compose

Education:

Madison Area Technical College, Madison, WI - 09/2018 – 05/2020

Associate in applied science: Web & Mobile Application Development

- **GPA:** 3.4
- **Recognition:** Spring 2020 Dean's List at Madison Area Technical College (4.0 GPA)
- **Relevant Development Coursework:**
 - o Java Programming, PHP & MySQL, Oracle SQL, Vanilla JS, Node JS, HTML5 and CSS, Linux Server1, IOS Applications development with Swift, Kotlin, UI/UX, Android Development with View and Jetpack compose, Agile Practices, MongoDB.

Dhurakij Pundit University International College, Bangkok, Thailand - 2010 – 2015

- **BA International Business:** Business Administration
- **Student Athlete:** Multiple University Tournaments championship - 2010 -2015
- **Outstanding Student Athletes:** 2012 Honored by University DPU Dean
- **Relevant Business Administration coursework:**
 - Managerial Accounting, Supply Chain Management, Business Management Strategy, Cross-Cultural Communication Management, Logistics and Principle of Marketing, Business Finance and Accounting, Entrepreneurship, Leadership, Operations Management, Business Information Systems, Global Business Management and Marketing.

Experience:

Backend Engineer, Infinite Series Labs LLC (Contract), WY - 01/2025 – Present

- Engineered a cloud-based domain registration orchestration service that validated domain availability and coordinated infrastructure provisioning workflows
- Built **DNS** record management workflows for custom domains.
- Conducted unit testing using **Jest** and resolved bugs to improve system performance and reliability. Stack used: **TypeScript, GraphQL, Docker** and **AWS Route 53**

Android Engineer, Amtelco, McFarland, WI - 02/2023 – 10/2024

- Developed features using **Kotlin, Retrofit, Room, Work Manager** and **Jetpack Compose**
- Implemented **Animations** and Unidirectional Data Flow (**UDF**) to improve architecture
- Built new features, fixed bugs and unit testing to ensure stability, and maintainability
- Collaborated on requirements and delivered updates based on users' feedback
- Stayed current with the latest Android development practices

Full Stack Engineer, MC Services, Pewaukee, WI - 01//2021 – 11/2022

- Developed a **Fence Estimator Web Application** using **MySQL, Node.js, Vanilla JS, HTML5, EJS, CSS, and Bootstrap**.
- Built a **Secure messaging platform** for ENT and PCP providers using **Node.js, FileMaker API, and MySQL**
- Designed and deployed websites with **WordPress and cPanel**

Web Application Tester Intern, NCCD, Madison, WI - 05/2019 – 05/2020

- Collaborated with developers to identify and resolve defects, ensuring high-quality releases
- Applied **QA** methodologies to improve testing efficiency and accuracy
- Documented workflows and system behavior using **XML, HTML, CSS, and SQL**
- Used **JIRA** to track test cycles and manage defect reporting

Projects:

Web Development Project:

Pallet Tracker system Web Application

Full-Stack Web Development Project

Developed a pallet tracking system enabling real-time item logging, unique tracking, and reporting (date filters, PDF, CSV exports).

- **Frontend:** React, HTML, SCSS, Font Awesome
- **Backend:** Java Spring Boot, PostgreSQL

One Stop Basketball Web Application

Full-Stack Web Development Project

Developed a full-stack web app delivering NBA/WNBA schedules, scores, news, and player/team stats.

- **Frontend:** React, HTML, CSS, Bootstrap (responsive UI)
- **Backend:** Node.js, Express, RESTful APIs, SQL database
- **Other:** MVC architecture, OOP, GitHub version control, Jest testing

Android Development Project:

UnMaskMedia (In Progress) –Jetpack Compose, MVVM, UDF, Retrofit, Auth0, Spring Boot

- Detects manipulated human media
- Uses AI-driven analysis to evaluate authenticity of images and videos
- Implements secure authentication and user management through Auth0
- PostgreSQL for user profiles, history of media analyzed, Analytics and insights

One Stop Basketball app –MVVM, UDF, Jetpack Compose, Firebase, Retrofit, Work Manager

- Designed, developed, and published a comprehensive basketball app delivering updates, game schedules, news, players, teams' details, and stats across the NBA and WNBA
- Available on Google Play under the name "FAB Basketball League".
